---

### Career objective:

I am a front-end web developer. My interests are new things and I love to create beautiful and performant products with delightful user experiences. I have also created 12 basic and full stark projects.

### Skills :

**Comfortable:** HTML, CSS, JavaScript, Bootstrap, Tailwind, React js, Daisyui, React router dom, React Hooks.

**Familiar:** Express Js, MongoDB, Firebase, Rest API, Node Js

**Tools:** Netlify, Figma, Vs Code, GitHub, Vercel

### Projects Experience:

**Fly-to-Grapher:** (A Single Professional Photographer Works) [Live Link](#) | [Client Link](#) | [Server Link](#)

- Users can see the latest service, reviews and Users can see some essential blogs.
- Add a service by any users and see the user's valuable reviews
- This project builds on firebase authentication. This is a responsive website for mobile users and desktop users.

**Technology used:** React router Dom, tailwind CSS, react-icons, daisyui react- hot -toast, firebase etc.

**Web development courses:** (Learning Platform Website) [Live Link](#) | [Client Link](#) | [Server Link](#)

- I explained a modern web skill and how to learn it. In this project, I am fetching the data from MongoDB and calling the data from the backend with the help of API.
- Users can buy any course. when a user creates an account on this site with their user's email. Then users see a toast message confirming their email verification. Users confirm and verify their email and can see the course details.
- If the user does not verify the email, then they will not be able to view the course details on this site

**Technology used:** React router Dom, Bootstrap, React Bootstrap, CSS, react- hot -toast, firebase etc.

**Quadra-quiz:** (Courses quiz Contest) [Live Link](#) | [Client Link](#)

- Using fetch to load the data from the API. call API dynamically
- The Correct answers and wrong answers to the questions are shown by toasts
- If you click on the eye icon, the correct answer to the questions will be shown through a toast.

**Technology used:** tailwind CSS, hero-icons, react-router-Dom, rechart etc.
